💼 AI Agents | Automation | Data Intelligence

Professional Summary

Smart systems developer with expertise in AI agents, automation, and data analysis. Skilled in building end-to-end intelligent solutions that automate workflows, generate content, analyze data, and interact with real users via APIs and chat platforms. Strong background in self-taught tools like GPT, Katalon Studio, Power BI, SQL, and n8n, delivering results across educational, government, and freelance settings.

Core Expertise

AI Agents & Workflow Automation

- GPT-powered agent design and prompt engineering
- WhatsApp, LinkedIn, and email integration
- Workflow automation via n8n, AutoHotkey, and Apps Script
- End-to-end UI testing using Katalon Studio

Data Analysis & Intelligence

- Power BI dashboards and custom visuals
- SQL for data extraction, cleaning, and reporting
- Google Sheets/Excel analytics and formulas
- ETL logic using n8n and Google Scripts

Integrated Smart Solutions

- Design systems that combine data intake, automated decision-making, and intelligent execution
- Use analytics to optimize agent response and automation flows

Sample Projects

- LinkedIn Smart Post Generator: GPT agent analyzes trends, generates posts, images, and saves to Sheets.
- WhatsApp Auto-Agent: Responds to messages and logs users to Google Drive.
- Power BI Dashboard for Ministry Data: Visualizes key metrics across school districts.
- Katalon-based Regression Bot: UI test suite for education and service platforms.

Education

B.Sc. in Computer Information Systems – Al-Quds Open University (2007) | GPA: 86.4

Languages

Arabic (Native), English (Fluent), Hebrew (Good)
